
COMPANY PROFILE

Products and services for industrial and building automation

PIANO INDUSTRIA 4.0

SIELCO SISTEMI

About us

Sielco Sistemi was created by the original group that in the early ,90 developed the software package for automation Winlog and now is offering its renewed and enhanced versions Winlog Pro and Winlog Evo, suited for Industry 4.0. Sielco Sistemi is a Microsoft partner and operates since 2005 under ISO 9001 (Vision 2000), the worldwide recognized reference for the quality control certification.

What we do

We offer a range of hardware & software products that allow you to build SCADA HMI applications for industrial and building automation. All products are high quality, reliable and easy to integrate with each other. Our offer is directed towards solution providers, system integrators, electrical installers, plant managers, operators of public utility networks. Our stand-out feature and strength lie in the ability to offer, in addition to the products, a prompt, accurate and thorough technical support. Our mission is to promote the diffusion of the SCADA software Winlog all over the world through the continuous product updating and improvement, the close collaboration with our customers and Solution Providers and the enforcement and enlargement of our network of Distributors; moreover Sielco Sistemi offers itself as a partner in development of integrated hardware/software solutions for a wide range of applications, such as supervisory control of industrial plants, production data acquisition and processing, quality control of production and storage process, remote control of peripheral devices or public utility networks.

Why choose us

Our know-how comes from direct experience gained in over twenty years of fieldwork. Among our customers are machine manufacturers, production managers, engineering companies and electrical installers. We have provided systems for supervision of industrial plants, for acquisition and processing of production data, for quality control of production and storing process, for building automation, for remote control of public utility networks. We have gained specific skills in several industrial sectors as textiles, plastics, food, ceramics and electronics. Sensitivity to our customer's needs is the most distinctive feature of the way we do business. We are committed to work closely with our customers, to find a common language, understand their specific problems and provide timely responses and solutions. Our services: training and upgrading courses, consultancy in the design phase, development of the project, assistance during start-up, after-sales support and technical assistance contracts.

What we offer

Winlog - Software packages for the development of multi-language HMI/SCADA applications accessible from smartphone or browser. It includes the most popular communication drivers and graphic libraries with thousands of static symbols and animated objects for industrial automation.

PClog - Industrial touch screen PCs (Panel PCs) equipped with Windows 10 IoT operating system and Winlog SCADA software licenses.

IOlog - A range of I/O modules and isolated serial converters available in three different versions. By linking one or more I/O modules to a PC running Winlog SCADA software, you can build a modular, reliable and convenient Data Acquisition System.

Customized solutions - Integrated hardware / software applications also on Cloud platform oriented to the opportunities offered by Industry 4.0.

Sales network

A network of distributors located in various countries supports Sielco Sistemi for marketing of Winlog SCADA software all over the world; all distributors have a qualified technical staff able to offer to their own customers both a technical assistance in product operation and the ability to develop Winlog applications.

For the development of applications on the Italian territory, Sielco Sistemi uses a network of Solution Providers present in the various regions.

Sielco Sistemi signed commercial cooperation agreements with some of the main manufacturers of electronic instrumentation that have been allowed to resell Winlog Pro software with their own brand and logo.
